What do you do as an intern at this organization?
This summer, I worked on tasks to prepare for the launch of the Genius Institute into the world. Tasks included compiling financial data, making charts, coding processes, creating commentaries for articles for the website, and researching for articles.

How did you find your internship?
I know someone that interned at Gap previously and I also have a family friend that works there.

What do you enjoy most about your internship?
I knew that what I was doing on a daily basis was helping the company and it was interesting work!

What do you find challenging?
You apply to the internship program as a whole, so you don't know what department you'll be working in until you arrive for your first day. I loved the department that I was placed in, but I wouldn't have loved working in HR. Luckily the program director works hard to get to know you and what department you'd enjoy the most and be the most compatible with.

What advice would you offer to someone who wants to make the most of an internship like yours?
For the Spring, the deadline was February 28th. My advice is to put in a good application and follow up to demonstrate your interest--it’s a competitive internship with lots of applicants.
