Marcelo Coelho Studio | www.cmarcelo.com

- Izel Maras (International Letters and Visual Studies, Computer Science minor, 2015)
- Studio Intern
- Full-time, 40 hours per week
- Paid

**What do you do as an intern at this organization?**
I worked on Visual Interface Coding, user interface design and graphic design.

**How did you find your internship?**
Jumbo Jobs

**What do you enjoy most about your internship?**
I am working in a workplace that I would enjoy working after graduation, and the creative projects I am involved in are really interesting. I never do the same thing for a day, and I keep learning new tools and skills with each project.

**What do you find challenging?**
I need to come up with immediate solutions to problems I am presented with, so there is no time to read or study what I should do – everything is hands on.

**What advice would you offer to someone who wants to make the most of an internship like yours?**
Don’t just apply somewhere to get an internship, apply to a company you are enthusiastic about working at.

**About the Organization**
Marcelo Coelho Studio
Cambridge, MA

Marcelo Coelho is an artist and designer whose work seeks to challenge our perception of the physical world by imbuing materials with computation. Spanning a wide range of media, processes, and scales, his work explores the boundaries between matter and information, shedding light on how our senses shape and limit our experiences, while using technology to create new forms of communication and expression. His studio is a creative co-working space where people with different skill sets (computer science, design, engineer) collaborate to actualize creative technology projects.
