- Tyler Lubeck (Computer Science, Entrepreneurial Leadership, 2015)
- Software Development Engineer Intern
- Full-time, 40 hours per week
- Paid

**What do you do as an intern at this organization?**
I write code all day. I'm working on the Sharepoint Experiences team, and my work ranges from front end design and javascript to creating APIs in C# on the server side.

**How did you find your internship?**
I was referred by a friend that worked at Microsoft last year.

**What do you enjoy most about your internship?**
I really enjoy being surrounded by people who are very likely the smartest software engineers around. There's always something to learn from somebody.

**What do you find challenging?**
Everything. I'm learning about large build systems and deployment solutions, as well as designing web services with a strong emphasis on performance and reliability for an incredibly large user base.

**What advice would you offer to someone who wants to make the most of an internship like yours?**
Talk to people. Everybody has a unique background and an interesting take on a problem. You'll be surrounded by people who have had more experience than you, and most of them will be more than happy to teach you what they know.

**About the Organization**
Microsoft
Redmond, WA

At Microsoft, our mission is to enable people and businesses throughout the world to realize their full potential.
